#### SUMMARY OF DESCRIPTION OF BUILDING METHOD OR PRODUCT

The SikaWrap Hex Structural Strengthening System is a textile based structural strengthening system available in two options:

- SikaWrap Hex-100G (Glass fiber) plus Sikadur Hex-300, plus the option of adding Sikacrete-213 F (for fire protection); OR .
- SikaWrap Hex-103C (Carbon Fiber) plus Sikadur Hex-300 plus the option of adding Sikacrete-213 F (for fire protection). .

Continuation of description can be found in item 9. Supporting Information about Description of Building Product or Method. Matters that should be taken into account in the use or application of the building method or product can be found in item 6. Conditions and Limitations of Use.

**KEY INFORMATION**

5

#### SUMMARY OF INTENDED USE OF BUILDING METHOD OR PRODUCT

The SikaWrap Hex Structural Strengthening System is used for the strengthening of reinforced concrete and reinforced and unreinforced masonry elements of existing buildings. Sikacrete-213 F is used where additional fire protection, to a strengthened structural element, is required.

Continuation of intended use can be found in item 10. Supporting Information about Intended use of Building Product or Method.

#### **BUILDING CODE PROVISIONS**

The performance clauses of the New Zealand Building Code that are relevant to the intended use and with which the building method or product complies or contributes to (where used as part of a system).

B1 Structure: B1.3.1, B1.3.2, B1.3.3(a, b, f), B1.3.4 B2 Durability: B2.3.1(a) C6 Structural Stability: C6.2, C6.3, C6.4 F2 Hazardous Building Materials: F2.3.1

How the building method or product complies or contributes can be found in item 12. Basis for Certification. Any qualifications on the extent of that compliance can be found in item 6. Conditions and limitations of use.

This certificate is issued by an independent certification body accredited by JAS-ANZ, the product certification accreditation body appointed by the Chief Executive of the Ministry of Business, Innovation and Employment under the Building Act 2004. The Ministry does not in any way warrant, guarantee, or represent that the building method or product that is the subject of this certificate conforms with the New Zealand Building Code, nor accept any liability arising out of the building method or product. The Ministry disclaims to the extent permitted by law, all liability (including negligence) for claims of losses, expenses, damages, and costs arising as a result of the use of the building method(s) or product(s) referred to in this certificate.

### SikaWrap Hex Structural Strengthening System

### CONDITIONS AND LIMITATIONS OF USE

- 1. Design of the strengthening works i.e. the specific Sika product items and their location in the structure, shall only be undertaken by a Chartered Professional Engineer (Structural) and shall only be installed by sole applicator BBR Contech.
- 2. The Fiber Reinforced Polymer (FRP) structural strengthening design for reinforced concrete structures shall be undertaken in accordance with ACI 440.2R-17, NZS 3101:2006 and AS/NZS 1170.0:2002.
- 3. The Fiber Reinforced Polymer (FRP) structural strengthening design for masonry structures shall be undertaken in accordance with ACI 440.7R-10, NZS4320:2004 and AS/NZS 1170.0:2002.
- 4. Where the SikaWrap Hex Structural Strengthening System is used in a part of a building to which NZ Building Code clause C3.4 (a) obligations apply, the system shall be covered by a material that meets the C3.4 (a) requirement for that part of the building.
- 5. Where additional fire protection is required, Sikacrete-213 F shall be used.

#### NOTE: Together, items 3, 4, 5 and 6 define scope of use.

#### HEALTH AND SAFETY INFORMATION

The compliance with any manufacturer's installation instructions, maintenance, OH & S statements, MSDS's and other Health and Safety declarations will provide the necessary Health and Safety Information pertaining to the product.
